

Flexible and comprehensive professional tester for HDBaseT installations

- HDBaseT Pass/Fail verification indicator
- Integral HDBaseT Transmitter/Receiver
- HDCP & HDMI compliant
- Detailed LCD display
- Real time data gathering
- Cable length measurement
- Signal strength indicator
- Bit error rate (BER) measurement
- Mean Square Error
- Max Error Measurement
- HDBaseT mode
- Simple LED indicators for:
 - HDBaseT Link
 - HDMI present
 - HDCP present
 - HPD/5V
- Compact lightweight design
- HDMI signal pass-through
- 2 models available TX and RX

Identify and quickly rectify problems in your HDBaseT installations with this handy tester

The Smart-e **4K-9000** (HDBaseT Install Tester) is a comprehensive test tool for any installer working with HDBaseT products. Using the tester enables problems on site to be easily identified, diagnosed and quickly rectified. The **4K-9000** is able to work as a TX/RX pair, measuring cable distance, bit error rate or simply provide a HDBaseT pass/fail indication. Compatible with any make of HDBaseT system, the 4K-TX9000 or 4K-RX9000 can also be used independently with any make of HDBaseT device including direct connection to displays and projectors.

During testing the **4K-9000** can output full HDMI digital video and embedded audio, with complete support for HD 720p, 1080p, UHD 2K and 4K resolutions and pass-through support for EDID, HDCP, CEC and control protocols.

Control of the **4K-9000** is achieved through the 3 buttons on the front of the product and feedback can be read through the 4 LEDs and the 2-line LCD display. The **4K-9000** has been designed to be simple to operate with just a few buttons with all the most important information on the home screen. Any more advanced operations are easily accessible through a simple menu system.

The 4K range is from a family of digital extenders & matrices using standard CAT 6-8 STP cable to transmit UHD signals over long distances

SPECIFICATION - GENERAL
Video - Digital

Standards	DVI 1.0, HDMI 1.2. HDCP 1.2
Maximum data rate	1..65Gbps per colour
Maximum pixel clock	165MHz
Resolution range - DTV	480i, 480p, 720p, 1080i,1080p
Resolution range - PC	VGA, SVGA, XGA, SXGA, UXGA
Frame rate	24, 25, 30, 50 & 60 Hz
Colour depth	8 bits per colour
Formats	RGB and YCrCb
Colour space	4:4:4, 4:2:2, 4:2:0

Audio - Digital

Standards	Embedded within the HDMI signal
Maximum audio channels	8
Maximum sample rate per channel	192 kHz
Sample size	16-24 bits

Power

DC Voltage	5V PSU
Connector	2.1mm DC jack
AC Voltage	100-230 VAC
AC frequency	50/60 Hz
Current	1A5

Cat cable connectivity

Protocol	HDBaseT
Number of cables	1 x Cat 6/6A screened twisted pair cable
Termination standard	TIA/EIA T568B
Cable requirements	Solid conductor, 24 AWG or better
Cable recommendations	400 MHz bandwidth STP (shielded twisted pair)
Transmission distance	100m using shielded twisted pair CAT 6/6A

Dimensions

Height	25mm
Width	90mm
Depth	145mm

HDBaseT installation authentication

Product: 4K-9000 HDBaseT tester

Smart-e

HDBaseT input

specifications are subject to change without notice

DESIGN

INNOVATE

ORIGINATE

Estimated cable length

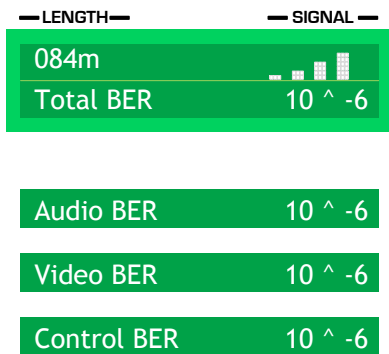

Signal strength

LCD display

Measurement status window, controlled by the scroll buttons

Bit Error Rate (BER)

The Bit Error Rate (BER) of each channel is measured and shown as individual values, the Total BER is only relevant for the transmitter

Mean Square Error

The Secondary quality indicator represent the Mean Square Error (MSE) and is measured for each channel of the cable

Max Error

The Max Error measurement estimates the quality of each channel

Operation Mode

Mode status: Disconnected, HDBaseT, Low power modes and Ethernet fallback

Firmware version

Firmware version can be read back from the remote device
